

CHAPTER ONE: CLAVE AND TUMBAO

Just as the most crucial element of rock and funk playing is in the backbeat, Afro-Cuban music is all centered around the *clave*, which incidentally, is Spanish for "key." The clave is an interchangeable two-bar rhythm to which all other rhythms must relate, either as "3:2" or "2:3."

Rumba clave 3:2

Rumba clave 2:3

This clave is often referred to as *rumba clave*. The *son clave* (also 3:2 or 2:3), doesn't displace the last 8th-note.

Son clave 3:2

In jazz or pop music you snap your fingers or clap on "2" and "4"; in Latin music you clap *clave*. Lyrics and melody usually determine how the music fits within the clave. In the course of a song, the relationship of the music to the clave can occasionally change from 3:2 to 2:3 (or 2:3 to 3:2). This will generally occur by either adding or dropping a bar, so that the two-bar clave itself is never simply reversed. By listening to the music of the idiom, you will come to understand how to hear what side of the clave a tune feels better on, and this will affect everything the band plays, including the percussion section, bass and piano, lead vocals and chorus, horn lines and accents, and final solo phrasing. Poorly phrased rhythms are referred to as *cruccao*, or crossed.

During the 1930's, 40's and 50's, great Latin band leaders such as Israel "Cachao" Lopez, Arsenio Rodriguez, Machito, Tito Puente and Tito Rodriguez, along with many others, developed an integration between African and European musical forms which had previously been for the most part segregated.

Generally speaking, these musicians combined African rhythmic structures with European harmonies, although African melodic and harmonic forms also played a role in the black music of the New World, as, for example, in blues music. In Cuba and Puerto Rico, this marriage led to a variety of musical styles and dances, such as son, mambo, guajira, bomba, plena, cha-cha, rumba and many others which today make up what is commonly known as salsa.

In salsa, the rhythm section consists of congas, timbales, bongos, bass and piano. The heart of the ensemble is to be found in the bass *tumbao*. A tumbao is a repeated figure (either on conga or bass) which creates the groove. For the Cubans the bass was a European instrument which could be used to imitate the sound of a drum, playing a role which had previously been served by the *marimba*, a large African thumb piano, or a *botija* (bass notes blown through a bottle). The music has since been played on upright bass, electric, or typically in many salsa bands, an electric upright called a "baby bass."

The following traditional examples are written as they would be seen in an actual Latin bass chart; however, note how in some of the audio examples the notes on the fourth beat are played long and extended over the bar. This is done to match up with

the conga tumbao. The attitude given this note by the bassist will effect the swing of the entire band. To make the notes fat and percussive, I usually use the lower, thicker strings (E,A,D) wherever possible.

The pulse is felt in cut-time.

2:3

Example 12: "Mambo" moving between two chords

A musical score for piano, featuring a single melodic line on a staff. The key signature is C major (one sharp). The time signature is 2:3. The melody consists of eighth-note patterns, primarily consisting of eighth-note pairs connected by slurs. The notes are distributed across the middle and upper octaves of the piano keyboard.

Example 3: Son Montuno moving between two chords

The musical score consists of two staves of music. The top staff begins with a key signature of one flat (B-flat), indicating E-flat major or A-flat minor. It features a C7 chord followed by a B-flat7 chord. The bottom staff begins with a key signature of three flats (E-flat, G-flat, B-flat), indicating A-flat major or D-flat minor. It also features a C7 chord followed by a B-flat7 chord. Both staves use a 2:3 time signature, indicated by a '2' over a '3' above the staff.

Example of Guaracha

A musical score for bassoon, page 2, system 2. The staff begins with a bass clef, followed by a key signature of one flat. The tempo is marked as 8x. The notes in the measure are eighth notes, starting on the second line of the staff and moving up and down the staff.

A way to internalize the clave is to practice tapping it with your foot while playing a tumbao. This is a method used by many Latin musicians (most notably Bobby Rodriguez the great bongo player who also worked with Tito Puente) and is an excellent independence exercise which really helps lock in the groove. The emphasis here is on accuracy, not speed. Begin with a medium tempo on

S tumbao independence exercise

<img alt="Open circle note

Now it is time to consider the basic rhythms the percussion section lays down in a typical salsa tune. First, there is the basic conga bao (or *masacote*) played on one, two or more drums: (note the low drum on the 3-side of the clave)

Conga tumbao

2:3 R E S E B L E Q Q R E S Q Q E Q Q

Example 6%Growth

3:2 or 2:3 8x

The musical score shows two measures for the bassoon. The first measure starts with a bass clef, a key signature of one flat, and a common time signature. The second measure begins with a key signature of one flat and a common time signature. Both measures feature eighth-note patterns. Measure 1 consists of a single eighth note followed by a sixteenth-note rest, then a sixteenth note tied to a sixteenth note, and finally a sixteenth-note rest. Measure 2 consists of a single eighth note followed by a sixteenth-note rest, then a sixteenth note tied to a sixteenth note, and finally a sixteenth-note rest.

the metronome (quarter-note = 76), then add the clave with your foot and gradually blend in the tumbao. The trick is to get the tumbao syncopated with the 2-side of the clave, in sequential order: foot-right hand, foot-right hand (note: on the 3-side of the clave, the foot and hand fall in unison).

The bongo player's—or *bongocero*'s—groove is the *martillo*, with alternating riffs conversing with the singer, which is known as the *repique*. Here is the basic martillo:

Bongo martillo pattern

2:3/3:2 F F F T F F O T F F F T F F O T

R L R L R L R L R L R L R L

When the song reaches the *montuno*, or chorus (*coro*), the bongocero plays the large bongo bell and usually plays this pattern:

Bongo montuno bell part

2:3 o * o * o * o *

C

After the coro, the tune generally goes into the *mambo* section, which is like a brass shout chorus, often followed by a horn or percussion solo. The bongocero will now play on his bell the rhythm the timbale player—or *timbalero*—was playing on the side of his drum during the verse.

The timbalero starts the tune (the verse) playing on the sides of the timbale—which is called playing *palla*, or *cascara*:

Timbale cascara pattern

2:3 > > > > > >

RH
LH

(w/o stick)

For the coro, the timbalero moves to his mambo bell and plays this bell-ride:

Timbale montuno bell ride

2:3 o o * * o o * * o o *

C

When the tune reaches the mambo section, the timbalero often moves to the cymbal, once again playing the cascara pattern with left hand accents on the drums. Another important function of the timbales is to announce the beginning of the montuno or other sections with an *abanico*, which is a rimshot followed by a double-stroke roll of varying length (depending on the tempo)

and ending with another rimshot on "1" of the next bar. An *abanico* is traditionally used to signal the introduction of a call-and-response bell pattern on the timbales. Interestingly enough, *abanico* means "fan," and the roll actually sounds a lot like a fan being whisked open with a flick of the wrist.

2:3 > >

R R R

3:2 > >

R R R

All of these percussion examples have so far been written in 2:3 clave; for 3:2 clave, the measures are simply reversed. It should also be understood that these are very basic versions of the parts these instruments play. There are also many variations and nuances always being added by each player, for example, with

the timbalero's left hand. It is important, however, to be familiar with the basic parts and to see how they can be applied to the drumset. On the following page is a skeleton transcription of the fundamental percussion section parts played during the course of a typical salsa tune:

Some notes on the parts:

Timbales

Verse—A common alternative to the left hand on the drum is to fill in the 8th-notes on the side of the other drum with the left hand.

2:3 > > > > > >

RH LH

Montuno—A common left hand alternative is to play clave on a mounted woodblock (this can also be done on the verse).

Mambo—This is the section during which the left hand is most free, riffing between low and high notes on the low drum.

Congas

Verse—The single open tone on the 3-side of the clave is often a matter of taste; it can also be staggered every 4 or even 8 bars though remember it will always appear only on the 3-side.

Mambo—The congas are more likely to play a bit freer in the mambo, using a few fills.

Bongos

Verse—The martillo pattern is the frame of reference for the riffing that the bongocero plays during the verse, always returning to it and playing off of it.

Montuno—Often the bongocero will wait for one or more coros to go by before picking up the bell, coinciding with the first or even second *inspiracion*—the lead vocal improvisation.

Mambo—There are sometimes other cowbell patterns that can be played in this section.

All of these rhythms can be condensed onto the drumset in a variety of ways, despite the fact that the drumset isn't a part of the typical salsa setting. It is most important to consider the role of the bass drum within the context of the bass tumbaos when playing Latin grooves. The drummer should rarely play on "1," because the essence of Latin swing comes from "4" being tied over to "1" of the next measure. Quarter-notes played on the beat are reserved for the cowbell, paila or cymbal patterns; the bottom instruments (bass, bass drum, congas, etc.) generally don't play on "1." The most common bass drum pattern is:

Bass drum pattern 2:3/3:2

Some common variations could be:

Bass drum variations 2:3

As for the bass, in keeping with the rhythmic foundation, chord changes are usually anticipated on the fourth beat of the preceding bar:

See how the note "F" is used as a common tone to make the line move smoothly. These ideas can be very useful for constructing mbaо-like lines through a sequence of chords:

...and now it's your turn to play some Bb blues:

3 B^b7 Eb^b7 B^b7 B^b7

Eb^b7 C⁷ F⁷ B^b7 G⁷

C⁷ F⁷ D⁷ G⁷ C⁷ F⁷

B^b7 D⁷ G^b7 B^b7 Eb^b7 A⁷ D⁷

G^b7 B^b7 Eb^b7 G^b7 B^b7 F⁷ B^b7

Eb^b7 A⁷ D⁷ G^b7 C^{#7} F^{#7}

B^b7 F⁷ B^b7 Eb^b7 C^{#7} F^{#7}

Here are some combinations of percussion section grooves played on drumset, beginning with the cascara pattern (right hand being played against the rumba clave (left hand) along with bass drum patterns 1 and 2. Practice with the hi-hat playing half-note and quarter-notes.

2:3 Rumba clave

The cascara pattern should be practiced on both sides of the clave using both rumba and son clave. Here for example is the six clave against the 3:2 cascara pattern:

3:2 Son clave

The left hand can also pick up the conga pattern, though this sounds a bit dated to me:

Left hand conga pattern

Here is the cowbell ride pattern against the rumba clave played with cross-stick:

The snare can also be used in a clave-like manner, which funks things up considerably:

A hand-drawn musical score for a single staff. The time signature is 2:3. The key signature has one sharp. The first measure shows a bass clef and a 'C' (common time). The second measure starts with an eighth note followed by a sixteenth note. The third measure consists of three eighth notes. The fourth measure contains four eighth notes. The fifth measure has three eighth notes. The sixth measure features two eighth notes. The seventh measure includes a bass clef, a 'C' (common time), and a 'G' (G major). The eighth measure ends with a bass clef and a 'G' (G major).

Practice all of the above rhythms with the hi-hat playing quarters and half-notes.

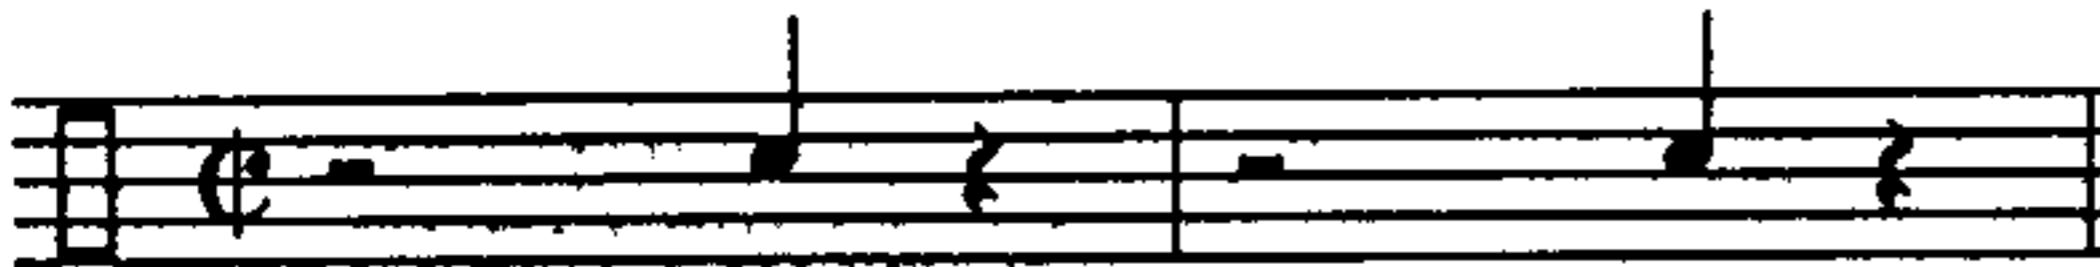

Just as the bass drum is rarely going to groove well playing downbeats, backbeats on "2" and "4" often go against the grain of this music. I have found that a single backbeat on the 2-side of the clave can work pretty well:

2:3

3:2

Keep in mind that when we are talking about backbeats, since we are generally in cut-time, the backbeat is really:

Here is a groove for the drums, mostly playing clave, which fits into a basic Latin percussion section without getting in the way:

WB

LLR L R L L R L L L R L

LLR L R L L

CHAPTER TWO: SONGO

Songo is a rhythmic form developed in the 1970's by the great Cuban percussionist Jose "Changuito" Quintana and bassist Juan Formell of the group Los Van Van. Songo represented a major breakthrough in Latin music by introducing the drumset into the standard percussion triumvirate of congas, timbales and bongos. While some timbale players had been known to add a bass drum or even a snare

into their set-ups, the songo rhythm finally put the drumset on equal footing with the other instruments. For the bass, songo represents a much more free and open style of playing. Ultimately, songo reflects the influence of rock and funk from the U.S., and that of other Caribbean-based styles, on Cuban musicians. Example 1 shows the basic songo rhythm on the drumset:

2:3

4x 4x

of these songo rhythms should be practiced with the hi-hat playing half-notes and quarter-notes. The left hand can also be orchestrated between the snare, toms, open hi-hat chokes, left hand cowbell, etc., providing an endless number of variations:

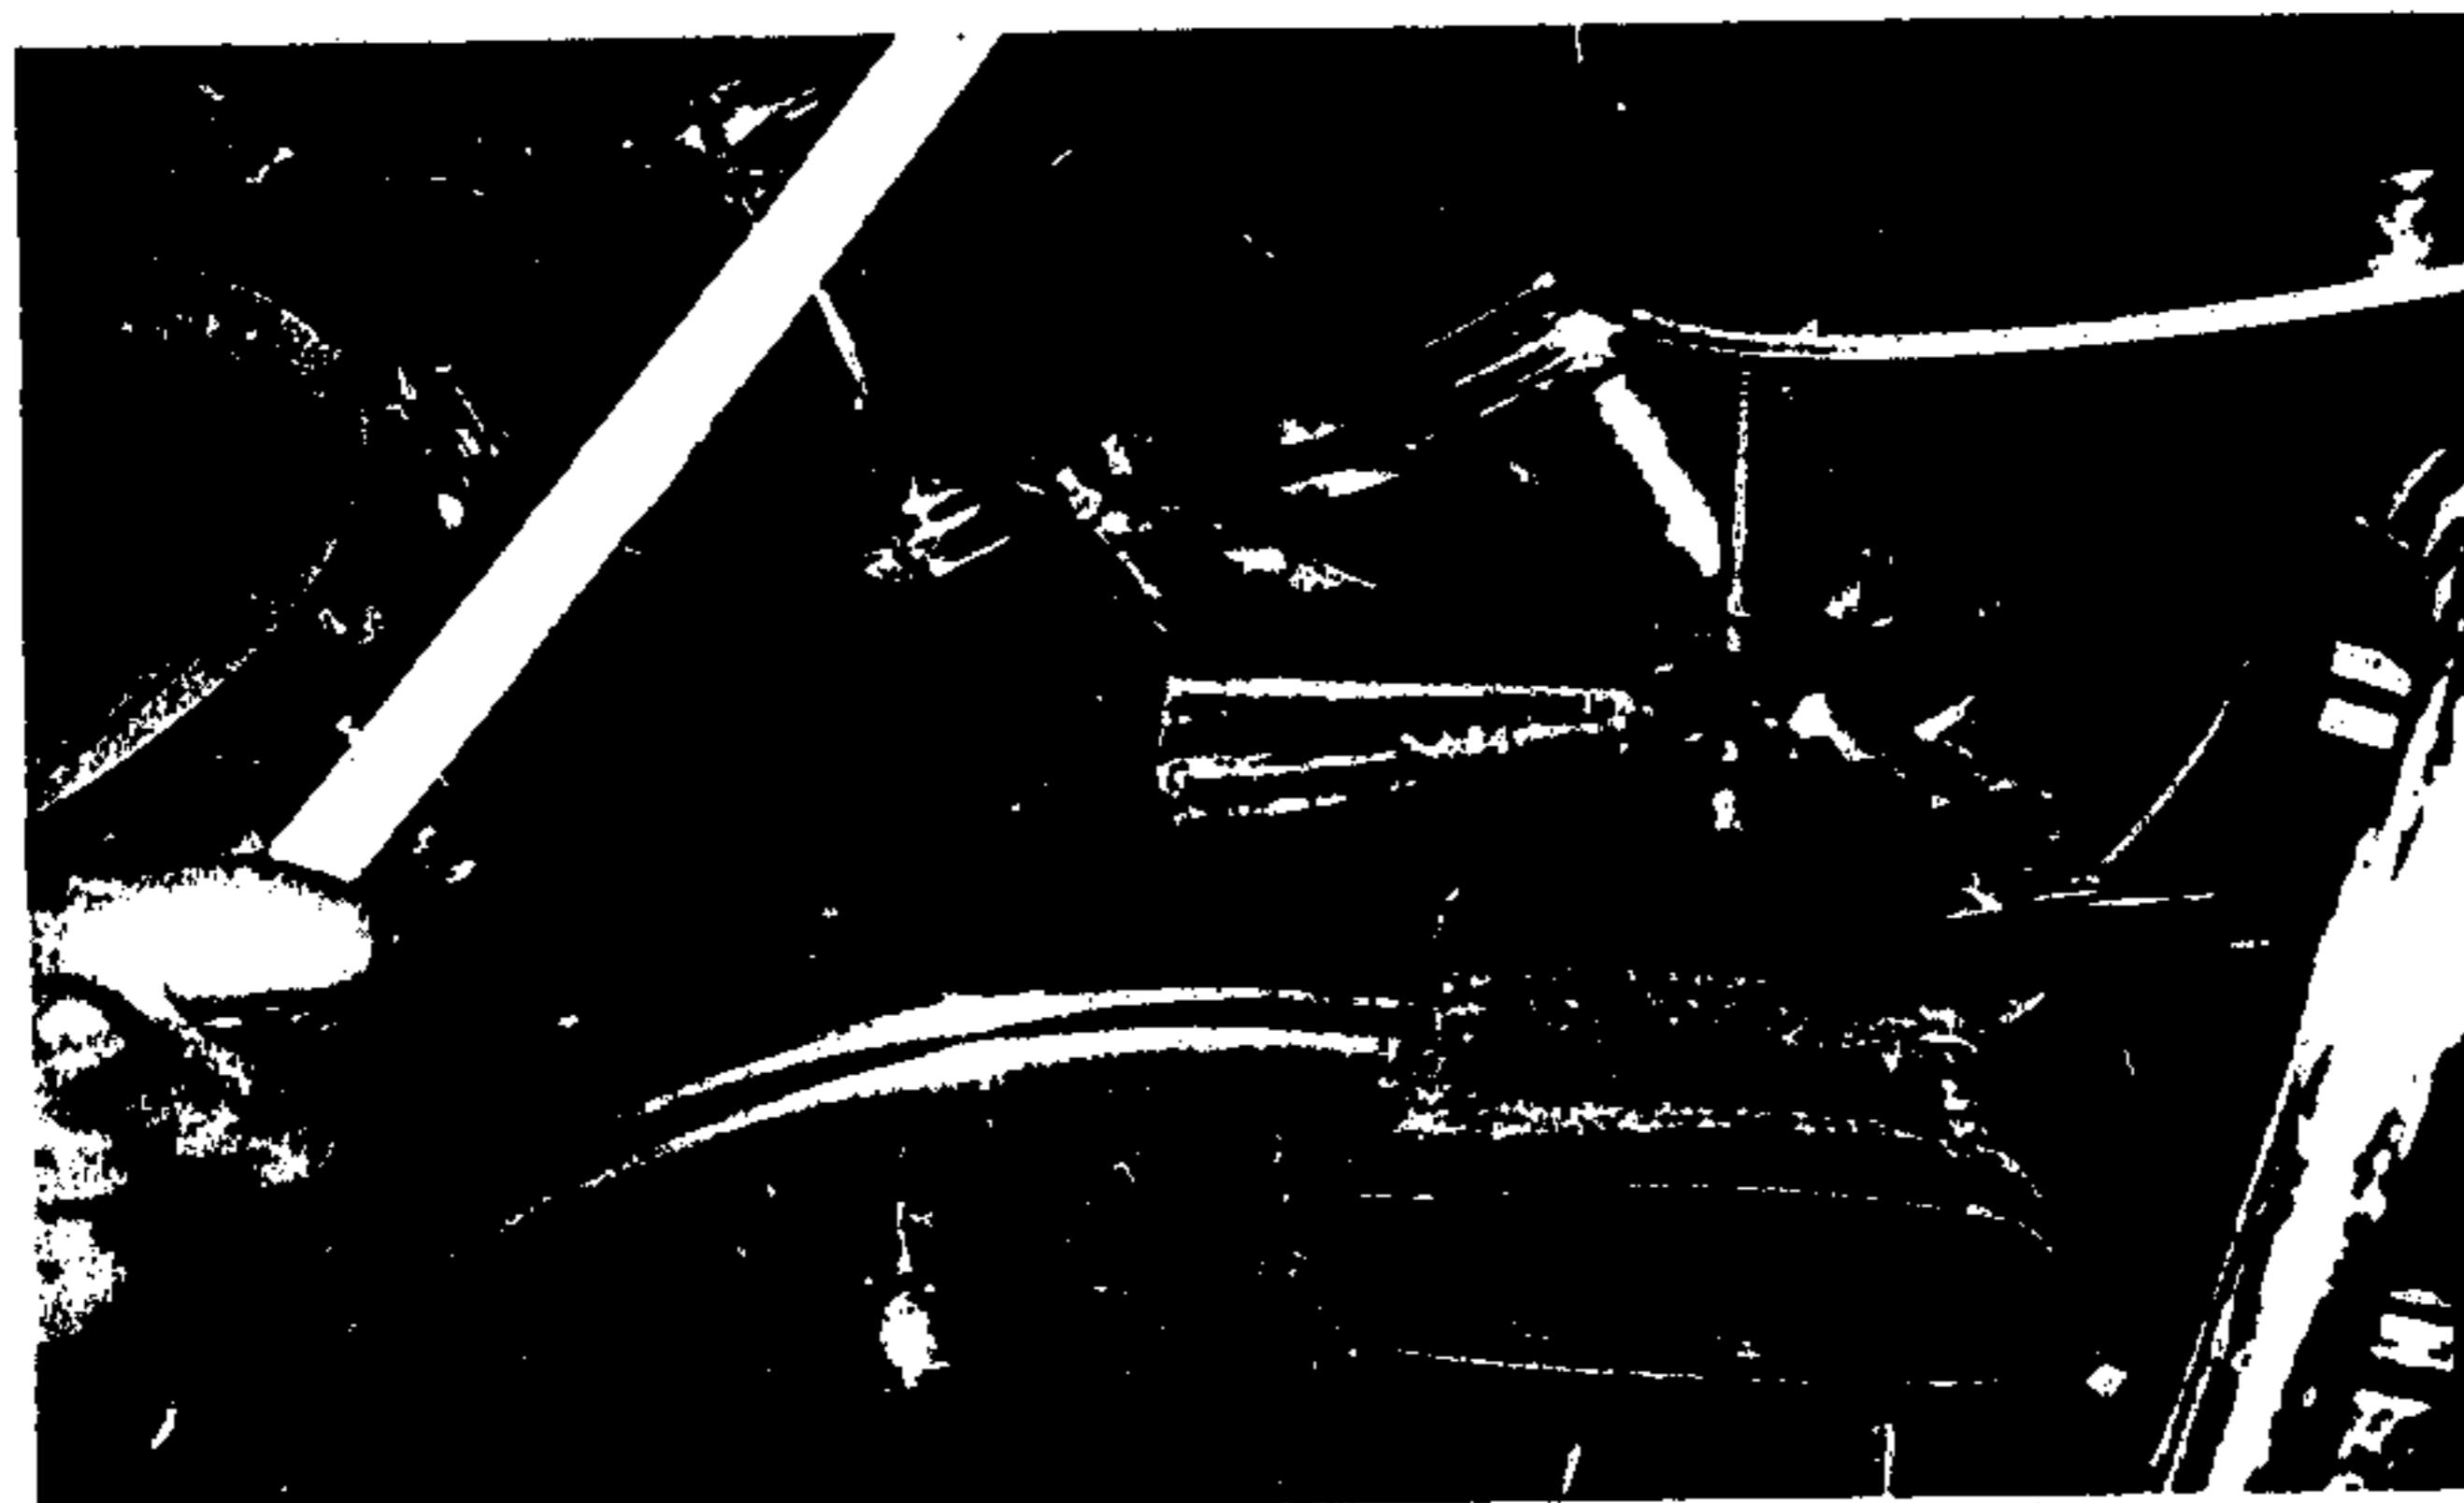

2:3

4x 4x 4x

(same as Example 2)

Similarly, the right hand need not stay locked into the quarter-notes on a single bell, but can add some notes or move around to higher bell:

(same as Example 4)

Another right hand pattern, which I heard Joel Rosenblatt use with Michel Camilio, is played between the right hand hi-hat and bell. I then added "sweeps" with the left foot on the hi-hat, to create the sound of the songo guiro pattern:

(same as 2nd part of Example 6)

(Naturally, the bass drum variations given in chapter one are completely compatible with all of these rhythms.)

When I first started playing songo behind different groups, I always found that unless I stuck to the left hand cross-stick type groove, the above variations often sounded too busy or cluttered (they worked better when limited to select parts of a tune, percus-

sion breakdowns, or soloing). I then decided to move most of left hand to the hi-hat while hitting the snare on a kind of backbeat. This created a much funkier and more versatile groove.

(same as Example 8)

Another instrument which the songo influenced are the congas. The pattern changed dramatically from the basic two drum asacote, to a much more expanded and melodic rhythm. Here is a stripped-down version of this conga pattern played between the toms on the drumset:

2:3

Example 10: Stripped-down conga pattern between the toms on the drumset

(same as Example 10)

Meanwhile, doing away with the cowbell altogether, it is possible to simply ride on the hi-hat, incorporating the songo backbeat and creating this funk groove. This example is shown with two snare drum variations.

Note that different toms may be substituted on the fourth beat of the 2nd bar.

2:3

Finally, one can ride on the cymbal, playing the songo pattern mostly on the snare drum with certain accents, creating a ride-out effect.

Example 11: Ride-out congo pattern played up on the cymbal with the snare and bass drums

2:3

While all of these examples have been given in 2:3 clave, they can also be played in 3:2 clave, as always, by beginning with the second measure.

In songo, while the tumbao for the bass remains intact or implied, other inflections can be added. Here are a few examples some possibilities for songo bass:

2:3

3:2

This pattern invites the bassist to occasionally fill in the space provided by the last two bars.

3:2 Rumba clave

C Δ D 7 G 7 F Δ

C Δ D 7 G 7 F Δ P H T H F Δ Fine

This next tumbao has a calypso influence.

3:2 A7 D7 C7 G7
4x

The bass lines of Andy Gonzalez (Eddie Palmieri, Libre, Fort Apache Band) are definitive examples of how pure folkloric elements can be used to create funky modern lines.

3:2 son clave

3:2 son clave
4x G7 % % %

Since all rhythmic and melodic figures in Latin music are drum oriented, as a bassist I found it very beneficial to sit down and learn some patterns on the drumset and congas—not only songo, but most of the other rhythms covered in this book as well, so I at least had a basic idea of how they are played. This helped me to hear how the patterns were pitched and to build permuted lines accordingly.

Here are some examples of how the slap technique can be used to further embellish a bass tumbao and build intensity in the rhythm section. This is a style developed by Latin session great Sal

Cuevas. These lines are essentially "double lines:" tumbao on the bottom and fragmented piano (montuno) or conga patterns (or the bassist's own personal funk phrasing) on the top.

While the initial attack should be sharp and percussive, the tumbao notes should ring over into each other in a legato fashion—keep the left hand relaxed and spread over the notes to be played. Keep the emphasis on the tumbao, and don't let the syncopations throw off the groove. Make the lines smooth but aggressive. Examples 6 and 7 begin with eight bars of basic tumbao:

<img alt="Musical score for Example 7 showing a bass line in 2:3 time. The score consists of ten measures of bass notes on a bass clef staff. Measure 1 starts with a T-P pattern. Measures 2-4 show a T-P-T pattern. Measures 5-6 show a P-T-P-T pattern. Measures 7-8 show a T-P-T pattern. Measures 9-10 show a simile pattern. Measure 11 starts with a T-P pattern. Measures 12-13 show a T-P-T pattern. Measures 14-15 show a P-T-P-T pattern. Measures 16-17 show a T-P-T pattern. Measures 18-19 show a simile pattern. Measures 20-21 show a T-P-T pattern. Measures 22-23 show a P-T-P-T pattern. Measures 24-25 show a T-P-T pattern. Measures 26-27 show a T-P-T pattern. Measures 28-29 show a P-T-P-T pattern. Measures 30-31 show a T-P-T pattern. Measures 32-33 show a T-P-T pattern. Measures 34-35 show a P-T-P-T pattern. Measures 36-37 show a T-P-T pattern. Measures 38-39 show a T-P-T pattern. Measures 40-41 show a P-T-P-T pattern. Measures 42-43 show a T-P-T pattern. Measures 44-45 show a T-P-T pattern. Measures 46-47 show a P-T-P-T pattern. Measures 48-49 show a T-P-T pattern. Measures 50-51 show a T-P-T pattern. Measures 52-53 show a P-T-P-T pattern. Measures 54-55 show a T-P-T pattern. Measures 56-57 show a T-P-T pattern. Measures 58-59 show a P-T-P-T pattern. Measures 60-61 show a T-P-T pattern. Measures 62-63 show a T-P-T pattern. Measures 64-65 show a P-T-P-T pattern. Measures 66-67 show a T-P-T pattern. Measures 68-69 show a T-P-T pattern. Measures 70-71 show a P-T-P-T pattern. Measures 72-73 show a T-P-T pattern. Measures 74-75 show a T-P-T pattern. Measures 76-77 show a P-T-P-T pattern. Measures 78-79 show a T-P-T pattern. Measures 80-81 show a T-P-T pattern. Measures 82-83 show a P-T-P-T pattern. Measures 84-85 show a T-P-T pattern. Measures 86-87 show a T-P-T pattern. Measures 88-89 show a P-T-P-T pattern. Measures 90-91 show a T-P-T pattern. Measures 92-93 show a T-P-T pattern. Measures 94-95 show a P-T-P-T pattern. Measures 96-97 show a T-P-T pattern. Measures 98-99 show a T-P-T pattern. Measures 100-101 show a P-T-P-T pattern. Measures 102-103 show a T-P-T pattern. Measures 104-105 show a T-P-T pattern. Measures 106-107 show a P-T-P-T pattern. Measures 108-109 show a T-P-T pattern. Measures 110-111 show a T-P-T pattern. Measures 112-113 show a P-T-P-T pattern. Measures 114-115 show a T-P-T pattern. Measures 116-117 show a T-P-T pattern. Measures 118-119 show a P-T-P-T pattern. Measures 120-121 show a T-P-T pattern. Measures 122-123 show a T-P-T pattern. Measures 124-125 show a P-T-P-T pattern. Measures 126-127 show a T-P-T pattern. Measures 128-129 show a T-P-T pattern. Measures 130-131 show a P-T-P-T pattern. Measures 132-133 show a T-P-T pattern. Measures 134-135 show a T-P-T pattern. Measures 136-137 show a P-T-P-T pattern. Measures 138-139 show a T-P-T pattern. Measures 140-141 show a T-P-T pattern. Measures 142-143 show a P-T-P-T pattern. Measures 144-145 show a T-P-T pattern. Measures 146-147 show a T-P-T pattern. Measures 148-149 show a P-T-P-T pattern. Measures 150-151 show a T-P-T pattern. Measures 152-153 show a T-P-T pattern. Measures 154-155 show a P-T-P-T pattern. Measures 156-157 show a T-P-T pattern. Measures 158-159 show a T-P-T pattern. Measures 160-161 show a P-T-P-T pattern. Measures 162-163 show a T-P-T pattern. Measures 164-165 show a T-P-T pattern. Measures 166-167 show a P-T-P-T pattern. Measures 168-169 show a T-P-T pattern. Measures 170-171 show a T-P-T pattern. Measures 172-173 show a P-T-P-T pattern. Measures 174-175 show a T-P-T pattern. Measures 176-177 show a T-P-T pattern. Measures 178-179 show a P-T-P-T pattern. Measures 180-181 show a T-P-T pattern. Measures 182-183 show a T-P-T pattern. Measures 184-185 show a P-T-P-T pattern. Measures 186-187 show a T-P-T pattern. Measures 188-189 show a T-P-T pattern. Measures 190-191 show a P-T-P-T pattern. Measures 192-193 show a T-P-T pattern. Measures 194-195 show a T-P-T pattern. Measures 196-197 show a P-T-P-T pattern. Measures 198-199 show a T-P-T pattern. Measures 200-201 show a T-P-T pattern. Measures 202-203 show a P-T-P-T pattern. Measures 204-205 show a T-P-T pattern. Measures 206-207 show a T-P-T pattern. Measures 208-209 show a P-T-P-T pattern. Measures 210-211 show a T-P-T pattern. Measures 212-213 show a T-P-T pattern. Measures 214-215 show a P-T-P-T pattern. Measures 216-217 show a T-P-T pattern. Measures 218-219 show a T-P-T pattern. Measures 220-221 show a P-T-P-T pattern. Measures 222-223 show a T-P-T pattern. Measures 224-225 show a T-P-T pattern. Measures 226-227 show a P-T-P-T pattern. Measures 228-229 show a T-P-T pattern. Measures 230-231 show a T-P-T pattern. Measures 232-233 show a P-T-P-T pattern. Measures 234-235 show a T-P-T pattern. Measures 236-237 show a T-P-T pattern. Measures 238-239 show a P-T-P-T pattern. Measures 240-241 show a T-P-T pattern. Measures 242-243 show a T-P-T pattern. Measures 244-245 show a P-T-P-T pattern. Measures 246-247 show a T-P-T pattern. Measures 248-249 show a T-P-T pattern. Measures 250-251 show a P-T-P-T pattern. Measures 252-253 show a T-P-T pattern. Measures 254-255 show a T-P-T pattern. Measures 256-257 show a P-T-P-T pattern. Measures 258-259 show a T-P-T pattern. Measures 260-261 show a T-P-T pattern. Measures 262-263 show a P-T-P-T pattern. Measures 264-265 show a T-P-T pattern. Measures 266-267 show a T-P-T pattern. Measures 268-269 show a P-T-P-T pattern. Measures 270-271 show a T-P-T pattern. Measures 272-273 show a T-P-T pattern. Measures 274-275 show a P-T-P-T pattern. Measures 276-277 show a T-P-T pattern. Measures 278-279 show a T-P-T pattern. Measures 280-281 show a P-T-P-T pattern. Measures 282-283 show a T-P-T pattern. Measures 284-285 show a T-P-T pattern. Measures 286-287 show a P-T-P-T pattern. Measures 288-289 show a T-P-T pattern. Measures 290-291 show a T-P-T pattern. Measures 292-293 show a P-T-P-T pattern. Measures 294-295 show a T-P-T pattern. Measures 296-297 show a T-P-T pattern. Measures 298-299 show a P-T-P-T pattern. Measures 300-301 show a T-P-T pattern. Measures 302-303 show a T-P-T pattern. Measures 304-305 show a P-T-P-T pattern. Measures 306-307 show a T-P-T pattern. Measures 308-309 show a T-P-T pattern. Measures 310-311 show a P-T-P-T pattern. Measures 312-313 show a T-P-T pattern. Measures 314-315 show a T-P-T pattern. Measures 316-317 show a P-T-P-T pattern. Measures 318-319 show a T-P-T pattern. Measures 320-321 show a T-P-T pattern. Measures 322-323 show a P-T-P-T pattern. Measures 324-325 show a T-P-T pattern. Measures 326-327 show a T-P-T pattern. Measures 328-329 show a P-T-P-T pattern. Measures 330-331 show a T-P-T pattern. Measures 332-333 show a T-P-T pattern. Measures 334-335 show a P-T-P-T pattern. Measures 336-337 show a T-P-T pattern. Measures 338-339 show a T-P-T pattern. Measures 340-341 show a P-T-P-T pattern. CHAPTER THREE: GUAGUANCO

guanco is properly defined in Afro-Cuban music as one of three "rumba" forms—*yambu*, *guaguancó*, and *rumba tumbia*. *Yambu* is played at slower tempos and basically involves the same parts as the *guaguancó*, while the *rumba tumbia* is played at fast tempos, with a stricter triplet feel. The traditional rumba group includes three congas, clave,

palito (stick pattern), vocals and sometimes bass and even *tres* (guitar). At the forefront are the dancers, either performing individually or as couples. The highest pitched conga (the *quinto*) is constantly riffing (the *repique*), also taking his cues from the dancer. A typical song begins with the clave and *palito*, followed by the drums, verse, chorus, *quinto* solo, chorus and out.

are the basic patterns of the percussion ensemble. The clave will be rumba clave:

Finally, the *quinto* solos over the whole ensemble, often weaving in and out of the implied quarter-note triplet and 8th-note (or triplet 16th-note) feels of the other drums.

(same as Example 1)

The floor tom can be added to reinforce the 3-side of the clave, which we will see greatly enhanced by the bass player's guaguancó tumbaos:
(not included on the tape)

The snare drum is basically playing the slaps of the tres golpes part, but the left hand can also riff around and play some quick licks, while the basic guaguancó voices are already being covered:

ext example works pretty well behind quieter sections of a tune, or during percussion, piano and bass solos.

V

C x

At this point, the rhythm starts to resemble a Bo Diddley/New Orleans second line style, where the pulse is more clave than backbeat.

L L R L R L > V o

LRL RLR L > V o

3:2

R R > o o RLR RRL > V o

The role of the bass functioning as a drum part is most evident in the guaguancó. This is a style of playing developed by Cachao, who in addition to playing with a full band, also recorded with just congas and vocals, along with the guitarist Arsenio

Rodríguez. In the first example, note the melodic similarity to tres golpes of the guaguancó. This line is commonly used both unison with, and as a call-and-response to, the tres golpes.

2:3/3:2

Cachao is a master at riffing around on the bass within the context of the clave, in much the same way as the quinto follows lead vocalist or the movements of the dancers in traditional rumba.

2:3

2:3

Like the drums, the bass can also get into the "Bo Diddley/New Orleans" groove by outlining the 3:2 clave in the following manner.

3:2

Here are some lines that combine elements of guaguancó, New Orleans second line style, and funk.

CHAPTER FOUR: AFRO-CUBAN 6/8

The Afro-Cuban 6/8 rhythm is probably the most versatile of all Afro-Cuban grooves inasmuch as it can lend itself to the widest varieties of time feels—one can play funk, rock, shuffle or straight-ahead jazz time over the same pulse. The possibilities

are similar to the many different approaches Tony Williams and Ron Carter used in playing Wayne Shorter's "Footprints" with Miles Davis.

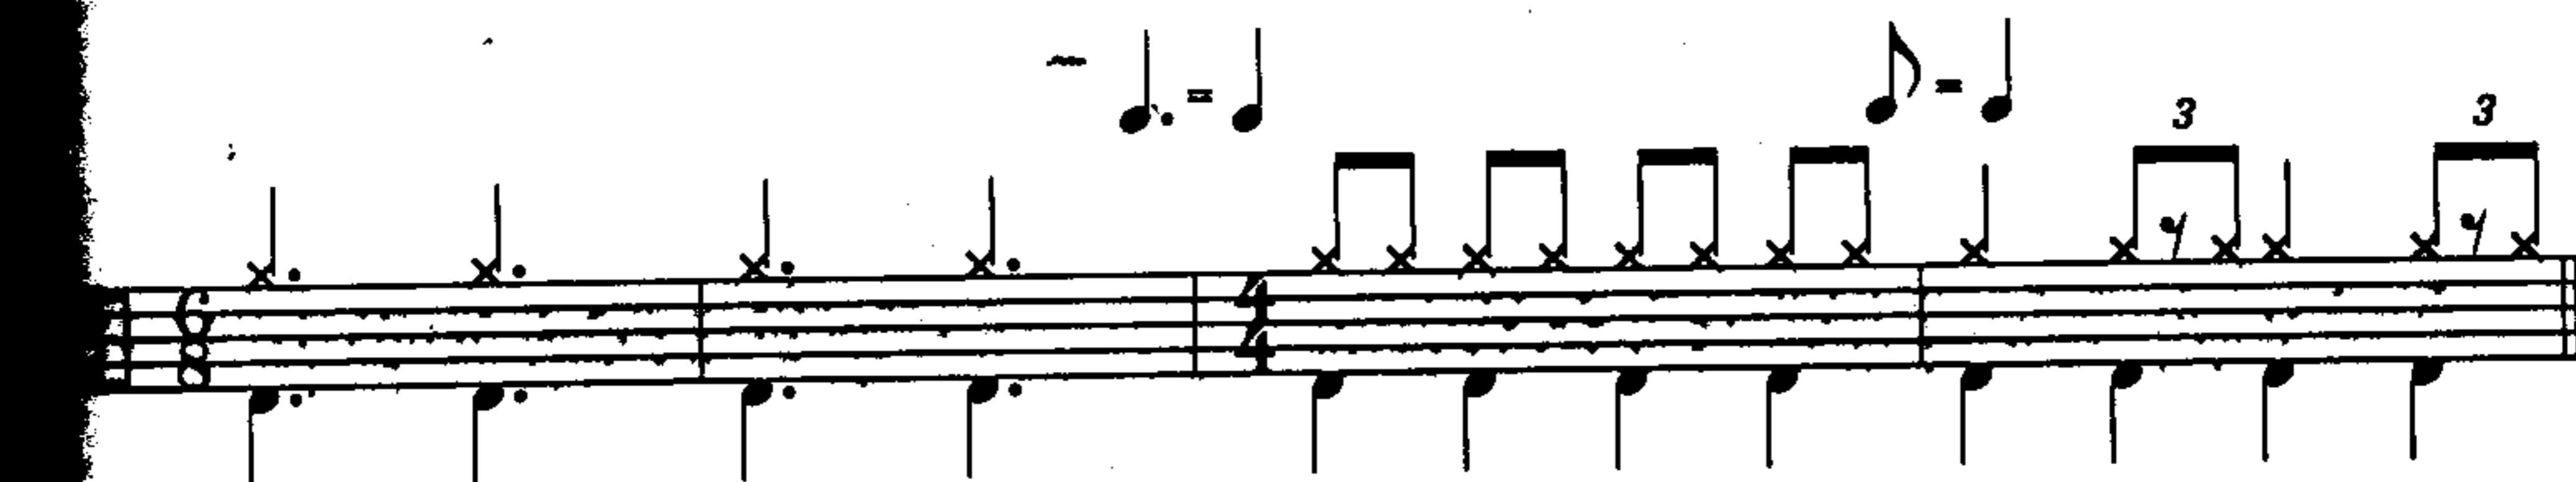

The basic 6/8 Afro-Cuban rhythm is:

If the dotted quarter becomes the quarter-note in 4/4 time, it creates a half-time jazz or a shuffle feel:

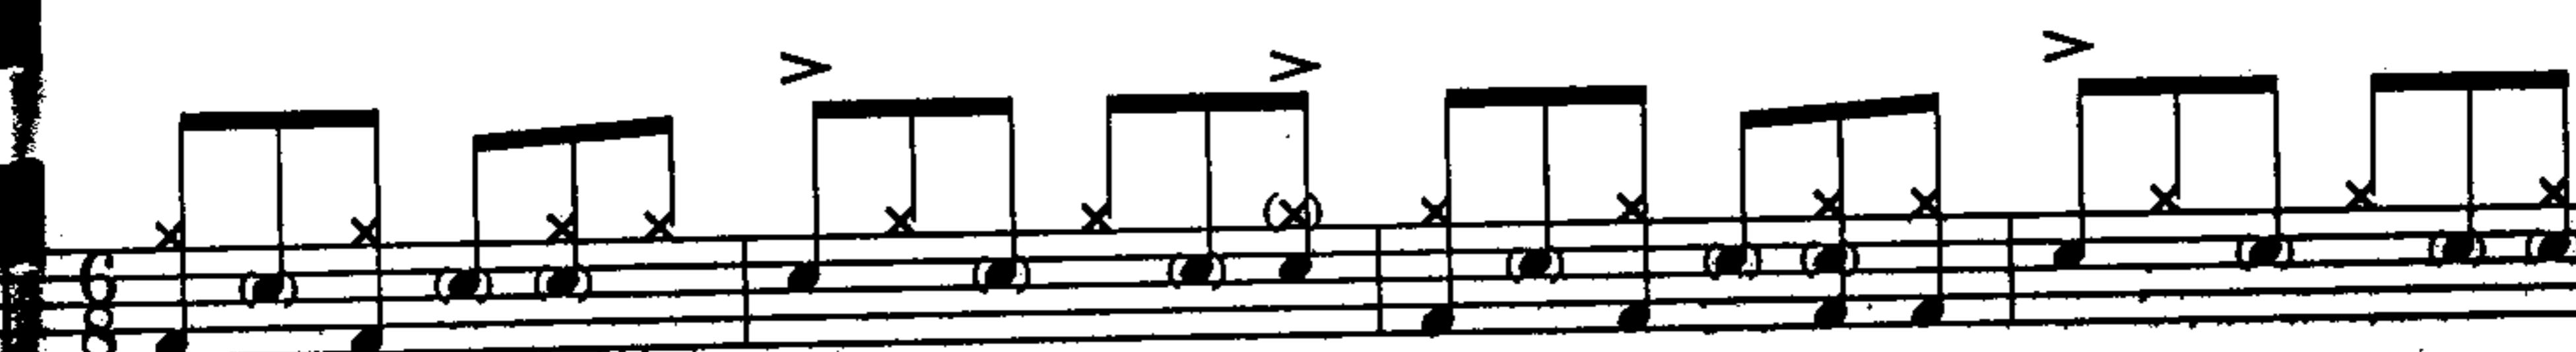

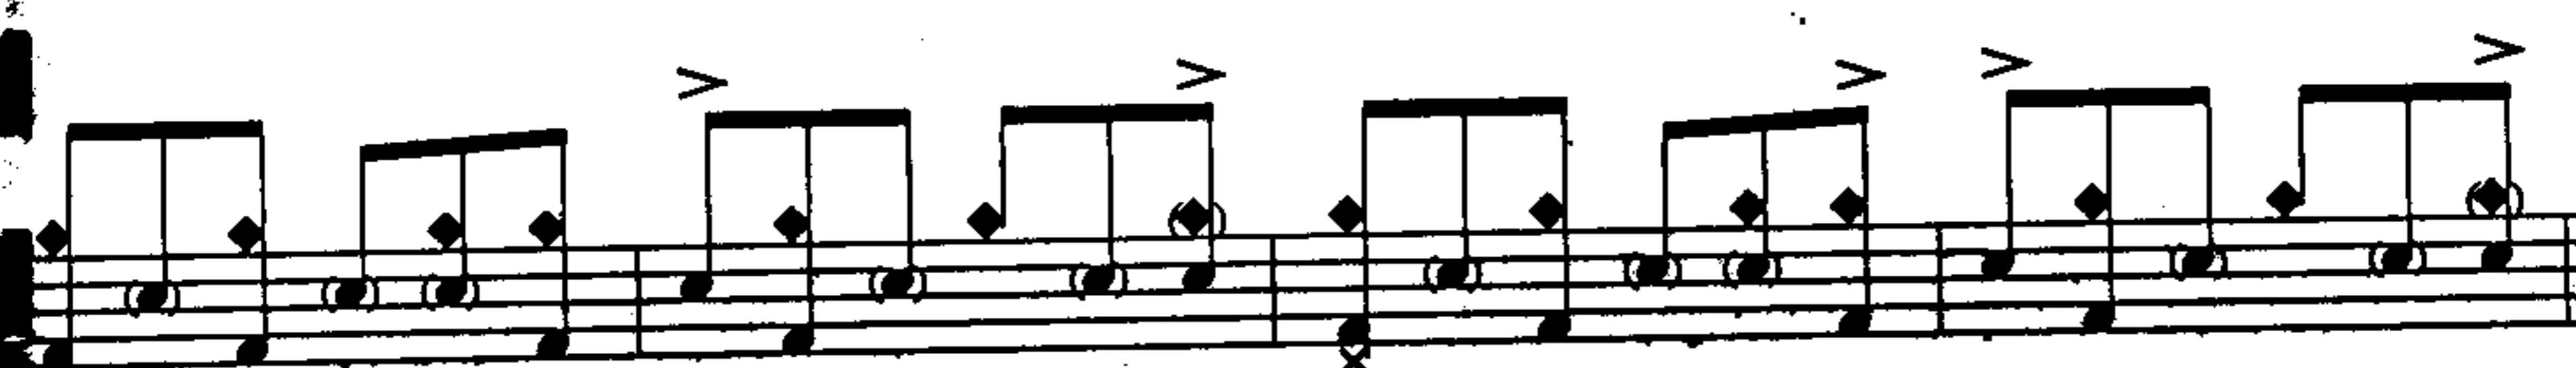

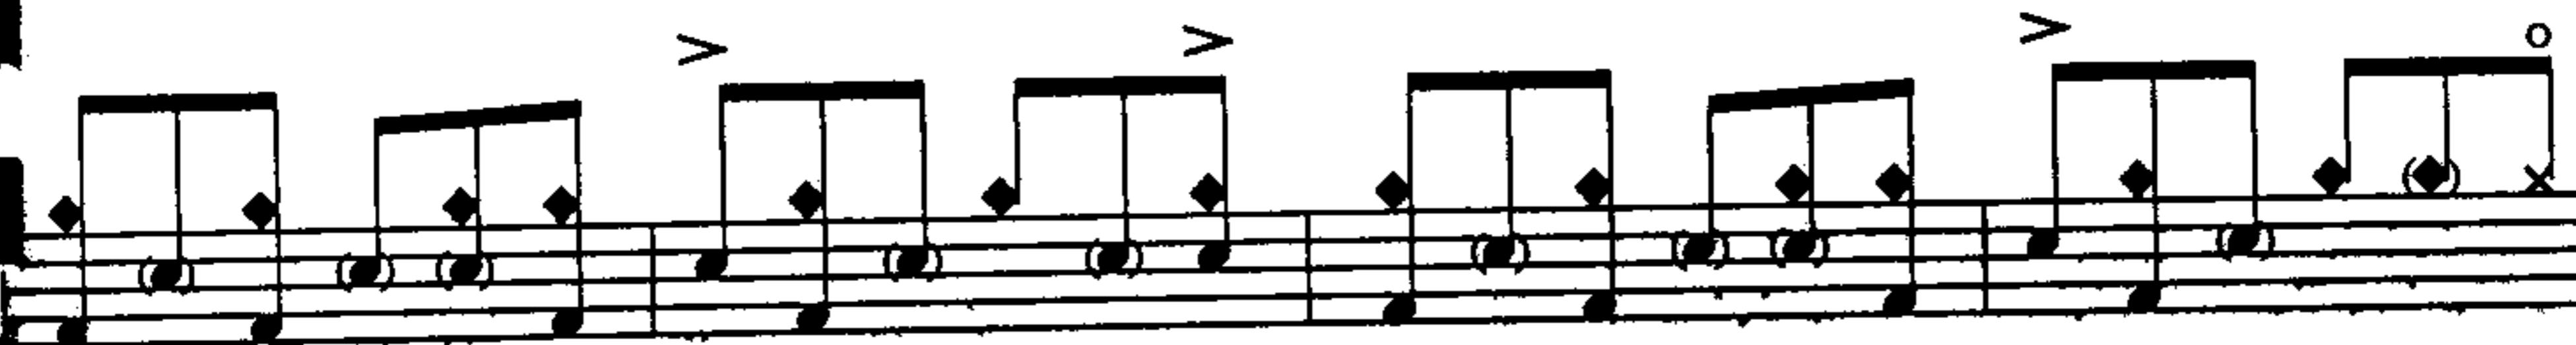

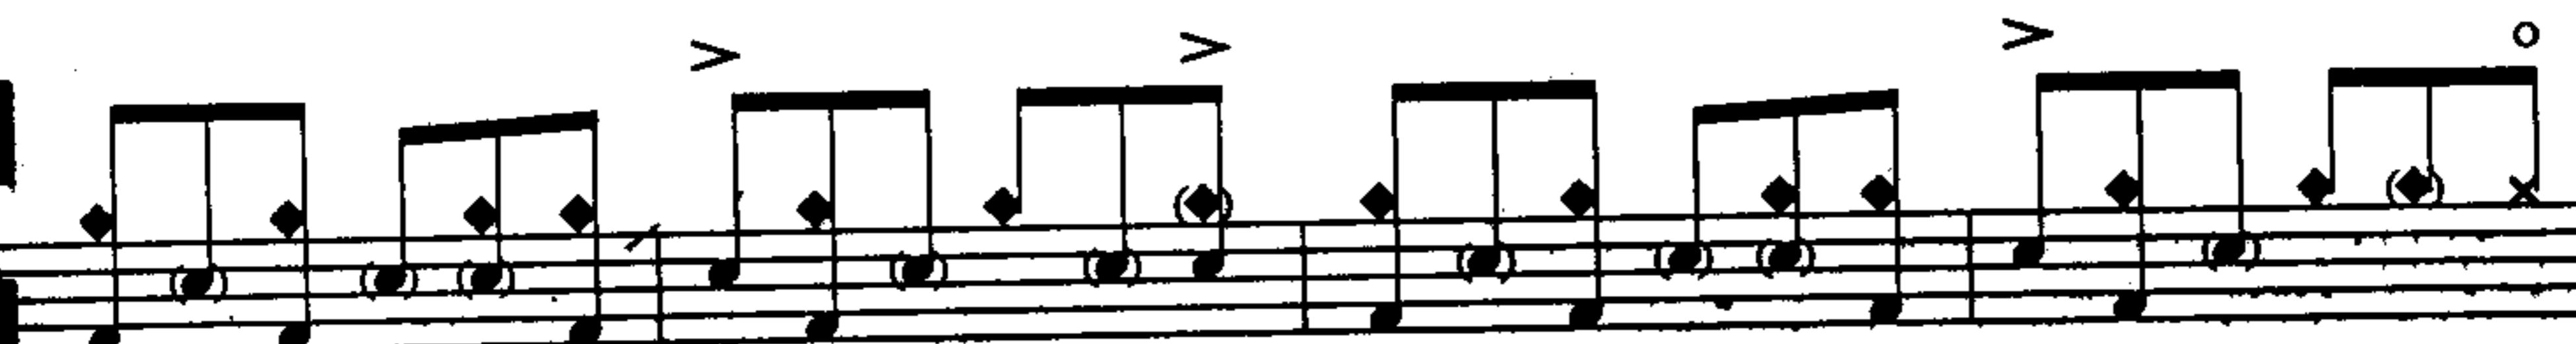

Similarly, with the dotted quarter becoming quarter-notes, you can play 8th-notes over the pulse, creating a double-time swing feel:

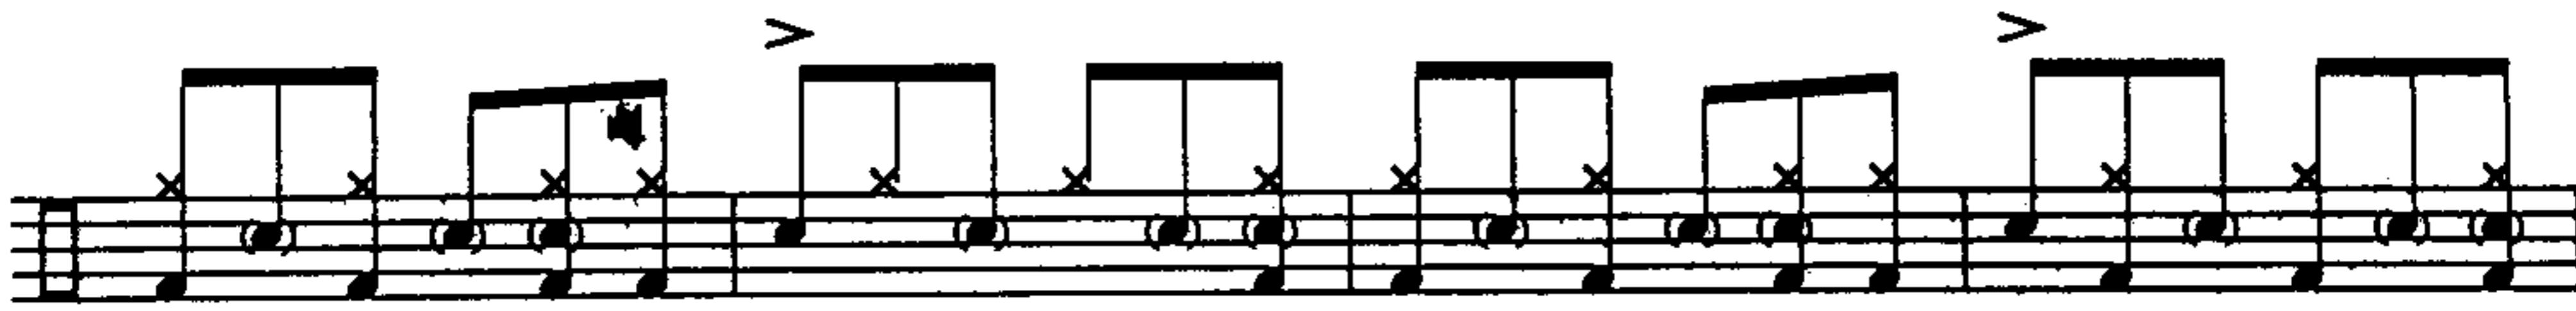

Meanwhile, the 8th-notes of the 6/8 can become 3/4 quarter-notes, creating a jazz-waltz feel:

feels make up the most common ways you can play 6/8; now we will detail some grooves for the drums:

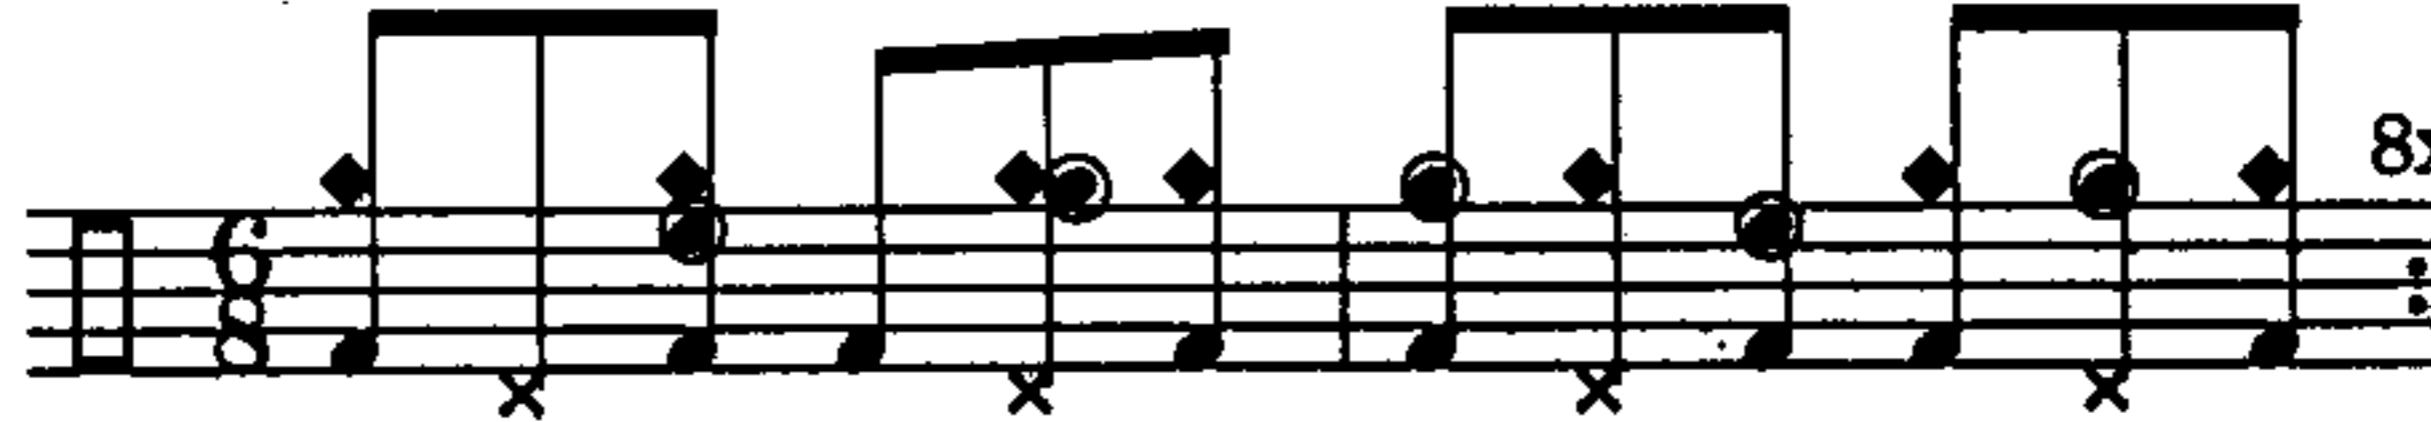

Keep in mind that there are many variations of this groove, which can involve all sorts of changes, such as using different bass drum patterns, adding toms, bringing out ghost notes, or even freeing yourself up from a backbeat pulse on "1" of each

second bar. One interesting pattern comes from a bass drum/hihat combination suggested by David Garibaldi's playing, which can be used underneath all of these patterns:

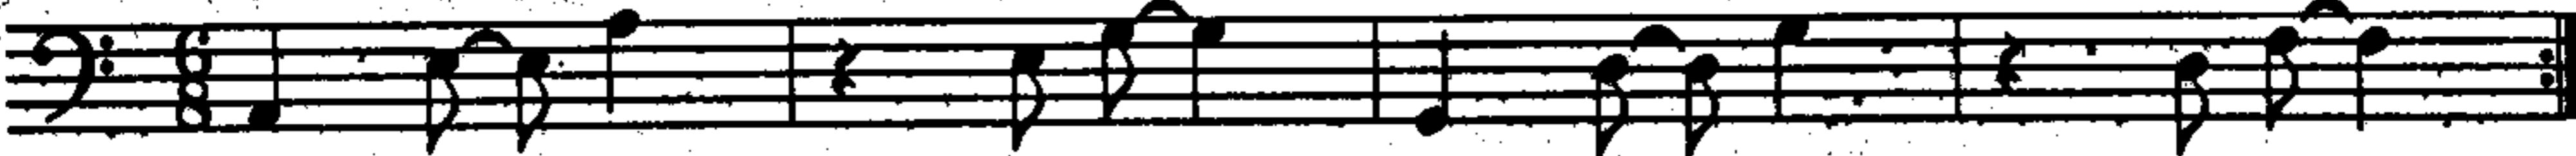

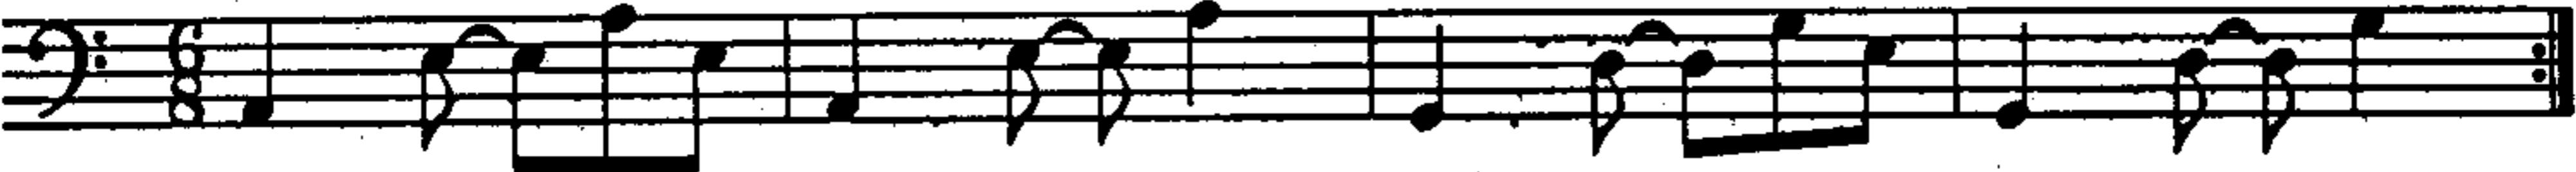

Keeping this pattern going with the feet, here is a tom idea which echoes a more folkloric conga pattern. Note its melodic similarity to the guaguancó:

Bass:

As with all the other Afro-Cuban rhythmic forms shown in this book, the 6/8 bass tumbao takes those elements from the drums that best connect rhythm and harmony. These lines are

very polyrhythmic in nature and can be heard and felt in many different ways. When playing them I usually feel the time moving in dotted quarters and make the notes long and even.

Three staves of musical notation for a bassoon, showing melodic patterns and fingerings. The notation is in common time (indicated by '8'). The first staff shows a continuous melody with various slurs and grace notes. The second staff is mostly obscured by a large black rectangular redaction. The third staff shows a more complex pattern with grace notes and specific fingerings indicated by 'T' (thumb) and 'P' (pinky) under certain notes.

T T P T P T P T P T P T P

CHAPTER FIVE: CHA-CHA AND MOZAMBIQUE

CHA-CHA

This chapter will focus on two other common grooves within the Afro-Cuban tradition.

The cha-cha groove is most easily recognized by tempo, which is generally medium-slow to medium (M.M. 88–132). More than any other Latin style, it may be the easiest to rock out

on, as it is one of the only basic rhythms that lends itself readily to a backbeat on "2" and "4," with the incorporation of the bass and sometimes bass drum on the downbeat. Anyone who has ever listened to Santana's version of the Tito Puente standard "Oye Como Va" knows what we mean.

Here is a basic cha-cha groove on the drums:

2:3

C

This musical example shows a single staff of 2:3 time. It consists of six measures of quarter notes. The first measure starts with an 'x' (bass drum) followed by a 'o' (timbale). The second measure starts with a 'x' followed by a 'x'. The third measure starts with a 'x' followed by a 'x'. The fourth measure starts with a 'x' followed by a 'x'. The fifth measure starts with a 'x' followed by a 'x'. The sixth measure starts with a 'x' followed by a 'x'.

2:3

C

This section contains three staves of 2:3 time, each consisting of six measures. The notation includes various symbols: 'o' (timbale), 'x' (bass drum), 'd' (tambourine), and 'o' (timbale). Measures 1-3 show a pattern of 'o', 'x', 'd', 'x', 'x', 'd'. Measures 4-6 show a pattern of 'o', 'x', 'd', 'x', 'x', 'd'. Measures 7-9 show a pattern of 'o', 'x', 'd', 'x', 'x', 'd'. Measures 10-12 show a pattern of 'o', 'x', 'd', 'x', 'x', 'd'.

Here are some possibilities for the more driving parts of the tune:

2:3

4x

C

This staff shows a 2:3 time signature with a '4x' marking above the staff. It consists of six measures. The first measure starts with a 'x' (bass drum) followed by a 'o' (timbale). The second measure starts with a 'x' followed by a 'x'. The third measure starts with a 'x' followed by a 'x'. The fourth measure starts with a 'x' followed by a 'x'. The fifth measure starts with a 'x' followed by a 'x'. The sixth measure starts with a 'x' followed by a 'x'.

Within the Latin context, the cha-cha is best characterized by the constant quarter-notes the timbale player plays on the small cha-cha bell.

2:3/3:2

Small cha-cha bell

LH on drum

This section shows two staves. The top staff is labeled '2:3/3:2' and 'Small cha-cha bell'. It consists of six measures of quarter notes. The bottom staff is labeled 'LH on drum'. It also consists of six measures of quarter notes.

Remember, the cha-cha can also be played in 3:2 clave.

bass tumbaos in the cha-cha often resemble the tumbaos of Chapter 1 played at a slower tempo. A good example of this is in the guajira groove (Chapter 1, Example 6). Slap songo lines can also work well at the cha-cha tempo. Here are some examples:

ZAMBIQUE

Zambiqe is another rhythm which has often been used in a rock and funk context. It forms the heartbeat of quite a few of Steve's Latin grooves, such as the drum part on Paul Simon's "Late In The Evening."

Here is the basic mozambique played on timbales

LH stick on drum

Again, we see the heavy accent on the "and" of "2" in the 3-part of the clave. Here is a funky version of the mozambique that moves nicely over a broad spectrum of tempos. Part of the funk comes from the bass drum playing both "1" and "2" of the first of the clave:

To see Steve's instructional videos "Up Close" and "In Session," available from DCI Music Video.

2:3

2

2

R R L L >

2

Like the drums, the bass line for the mozambique often starts on the downbeat of the 2:3 clave. Also characteristic is the rhythmic pattern of the first bar and the 7th of the chord on the 8th-note preceding the second bar.

2:3

4x

"Luis's Groove"

2:3

4x

"Irio's Tumbao"

2:3

This next line matches up with the mozambique timbale pattern:

Mozambique

2:3

A musical score for a single line instrument, likely a timbale or conga. It consists of two staves of music. The first staff starts with a C major chord (C, E, G) followed by a bass note. The second staff begins with a G major chord (G, B, D). The notation includes various note heads and stems, with some notes having horizontal dashes through them. The instruction "4x" is written above the first staff. Below the notes, a rhythmic pattern is labeled: T T P T P P T T P T P T.

Certain cha-cha and mozambique grooves the downbeat will be incorporated, whether on the 2-side or the 3-side of the clave. At large, we have only seen this to occur in the New Orleans-guaguanco grooves, where the downbeat of the 3-side of the clave is played.
