

Tips for the AOI Practice Pages

To get the best use of the Practice Pages, follow these tips:

1. If you need help with the chord progressions, print out the Chord Book and use it as you play along. The printed progressions are in pretty much the same order as the ones listed on the screen.
2. You can also access the chord progressions from the Book PDF file. If you're using the chord book extensively, it may be easier to launch the sound files from the Book PDF file instead of the AOI Practice Page PDF file. In the Book file, the play-alongs have titles like 09-Fusion-90, etc. – just click on a title to launch that file, and read the chord progression below it (C, Bb, or Eb, depending on your instrument).
3. If you use the AOI Practice Pages PDF screen (colored green), remember that the titles correspond to concert keys. So if you are a Bb instrument player, clicking C Fusion means you'll need to play in the key of D to match it (standard transposition).
4. Remember that the AOI Practice Pages PDF screen is 2 pages long, not just one.
5. The Book PDF file has a page near the end called “How to Use the Practice Pages” – see it for additional details.
