INTRODUCTION

This folio represents various types of tunes, mostly in the Soul style of music, of my original bass lines from the indicated hit records. They represent much of what is being written today in the studios for Electric Bass players although some of the tunes had no bass lines written and were improvised lines on my part at the time of recording them (from 1965 through 1971). The rest had skeleton parts written which I had to "improve" upon to help make the recording feel good. Today's musician is called upon to read more and more and so I felt that this book was necessary for practice. The hit records are all familiar and the parts will be good for sight-reading practice as well as study in continuity. It would be a good idea to purchase these records to play along with. The tempo indications are approximate as the band rushes and drags in spots, feel was the utmost important thing. The bass doesn't sound very distinct on the earlier recordings as on the later ones, but one can play along with these and benefit by it.

Lately, it has been pleasurable to hear so many fine bass players play so tastefully in all of the new great Rock groups. One of which is John Clayton, Ray Brown's protege who I am proud to say, mine also. He assisted me in the music preparation of this book and my heartfelt thanks go to him for the arduous work he has done. We both hope you like this book and that it will be a challenge and a pleasure to play. Thanks also to Valda Hammick of Australia.

Sincerely,

Carol Kaye

BOOTS

Original Bass Line as recorded with Nancy Sinatra at United Recorders (approximately 1967)

Repeat 3 times
BACK IN MY ARMS

Original Bass Line as recorded with The Supremes at Steiner's Studio (approximately 1967)
